

L^AT_EX-Beamer Style for NTNU

Demo of the `horizontal` style

Ronny Bergmann

August 31, 2021

A slide in horizontal style

This style is set up with

```
\usetheme[slogan=norsk, style=horizontal]{NTNU}
```

Here you can see that the `horizontal` style has a horizontal line in the footer with the logo in white and the name of the university on the title (see previous slide).

The slogan can be english or norwegian depending on the `slogan=` option, here it is set to `norsk`.

The slide number can also have the total number of slides setting `frametotal=true`, which is `false` (the default) here.

The font in math mode is here set by `mathfont=sans` (default) and looks like this:

$$e^{-\frac{a}{2}x^2} = \sqrt{\frac{1}{2\pi a}} \int_{-\infty}^{\infty} dy e^{-\left(\frac{y^2}{2a} + i y x\right)}$$
